

Money Plant

– Serah Fathima

What is a money plant?

The term "money plant" can refer to several different plants, most commonly *Epipremnum aureum* (also known as Golden Pothos or Devil's Ivy) and *Pilea peperomioides* (Chinese Money Plant). Both are popular houseplants, prized for their attractive foliage and perceived ability to bring good luck and prosperity, especially according to Feng Shui and Vastu Shastra.

What is a money plant used for?

Known as Golden Pothos, Devil's Ivy, or simply the Money plant, this green wonder is loved for its air-purifying properties and its cultural importance in Indian homes. Beyond its beauty, the Money plant uses range from emotional well-being to improving indoor air quality.

How do you take care of a money plant?

Water your money plant regularly, but don't overwater it. Fertilize your money plant once a month during the spring and summer. Repot your money plant every two to three years. Place your money plant in a bright, indirect light location. Mist your money plant.
