

# Small Amaryllifolius - Simple Guide

## What is Small Amaryllifolius?

Small Amaryllifolius, commonly known as pandan or pandanus, is a tropical plant known for its fragrant leaves. It is widely used in Southeast Asian cooking and as a natural air freshener.

## Key Features

- Long, narrow, blade-like green leaves
- Pleasant, sweet aroma
- Grows well in tropical climates
- Often used in gardens and homes as an ornamental or culinary plant

## Uses

- Cooking: Adds aroma to rice and desserts
- Air freshener: Leaves are used to scent rooms and clothes
- Medicinal: Used in traditional remedies for its calming properties

## Care Tips

- Requires moderate sunlight
- Water regularly, but avoid overwatering
- Prefers warm, humid environments
